Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Aims

Pharmaceutics (ISSN 1999-4923) is an open access journal which provides an advanced forum for the science and technology of pharmaceuticals and biopharmaceuticals. Covered topics include pharmaceutical formulation, process development, drug delivery, pharmacokinetics, biopharmaceuticals, pharmacogenetics, and interdisciplinary research involving, but not limited to, engineering, biomedical sciences, and cell biology. Our aim is to encourage scientists to publish their experimental results and theoretical assumptions in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced. In addition, this journal presents the following unique features:

Scope

- Pharmaceutical formulation
- Delivery and controlled-release systems for drugs, vaccines, and biopharmaceuticals
- Pharmaceutical process, engineering, biotechnology, and nanotechnology
- Devices, cells, molecular biology, and materials science related to drugs and drug delivery
- Pharmacogenetics and pharmacogenomics
- Biopharmaceutics
- Drug targeting
- Drug design
- Pharmacokinetics, toxicokinetics: effects of the body on drugs (absorption, distribution, metabolism, excretion); pharmacokinetic analysis
- Pharmacodynamics: physiological and biochemical effects of drugs on the body; drug-receptor interactions
